

Description for Sports Broadcast Recording

This recording was the last coverage of the Queen's Football team this season as they lost in the Ontario finals to Western University. Our broadcast team covered every football game this season, all 8 regular season and 2 playoff games and became the voice of Gaels football for many students, members of the community, and people all over the world listening to our online stream. The broadcast crew treated the playoff game in a similar matter as the players did, meaning they wanted to save their best performance for last. This meant the highest production, quality, and the best script the broadcasters performed this season. The game was roughly 4 hours in length, including the pre and post game shows, and unfortunately for the Queen's broadcast crew, the game was out of hand early in the second half in favour of Western. However the broadcast still maintained a high level of quality and did a terrific job mixing the call of the game coupled with going over the highlights of the season and getting fans excited for next year.
